

SOLAR STATION / RENEWABLE ENERGY EQUIPMENT

From \$200

7 days delivery

From a trusted manufacturer — full cycle project management

Energy

Environmental

We've helped in a lot of industrial and renewable energy projects with a strong base of equipment suppliers and Tier 1 solar panel contacts. Get a full cycle of project management from sourcing to customs clearance.

Project Details

- Sourced in China and helped purchase all modern automated equipment for the Kenya maize Processing Plants. The final step of the project is solar panels on the whole plant roof, hill, and parking lots.
- You will get: full cycle project management, negotiations, contract negotiations, quality control support, logistic organization, and customs clearance support.

Steps for Completing Your Project

1

Send Requirements

Describe your project in detail. Specify estimated equipment order quantity and project schedule.

2

Starter — Discovery & Quotes

Negotiations with all manufacturers and their engineers about project readiness. Getting preliminary quotes and connecting you with the manufacturers.

3

Standard — Securing the Deal

Contract negotiations, signing, order placing.

4

Advanced — Full Project Support

Quality control (factory audit + inspections), logistics organization, documents checking, customs clearance support, limitless consultation.
